

INTISARI

Asesmen Nasional Berbasis Komputer (ANBK) merupakan program Kementerian Pendidikan dan Budaya yang memiliki tujuan sebagai penilaian mutu sekolah baik negeri maupun swasta. Penelitian ini bertujuan untuk mengetahui tingkat penerimaan Asesmen Nasional Berbasis Komputer menggunakan metode TAM. Sumber data berasal dari penyebaran kuesioner menggunakan skala likert. Data yang diperoleh kemudian diolah menggunakan perangkat lunak SPSS v23. Variabel Perceived Ease of Use (PEU) berpengaruh terhadap Perceived Usefulness (PU) dengan nilai t hitung sebesar 6,652, variabel Behavioral Intention (BI) berpengaruh terhadap Actual Usage (AU) sebesar dengan nilai t hitung 7,547, variabel Perceived Usefulness (PU) berpengaruh terhadap Behavioral Intention (BI) sebesar dengan nilai t hitung 7,259, variabel Attitude Toward Using (ATU) berpengaruh terhadap Behavioral Intention (BI) sebesar dengan nilai t hitung 4,131, variabel Perceived Usefulness (PU) berpengaruh terhadap Attitude Toward Using (ATU) sebesar dengan nilai t hitung 2,810, dan variabel Perceived Ease of Use (PEU) tidak berpengaruh dengan variabel Perceived Usefulness (PU) sebesar dengan nilai t hitung 0,308.

Kata kunci: Perceived Usefulness (PU), Behavioral Intention (BI), ANBK, TAM.

ABSTRACT

The Computer-Based National Assessment (ANBK) is a program of the Ministry of Education and Culture which has the aim of assessing the quality of schools, both public and private. This study aims to determine the level of acceptance of the Computer-Based National Assessment using the TAM method. The source of data comes from distributing questionnaires using a Likert scale. The data obtained were then processed using SPSS v23 software. The Perceived Ease of Use (PEU) variable has an effect on Perceived Usefulness (PU) with a t value of 6.652, the Behavioral Intention (BI) variable has an effect on Actual Usage (AU) with a t value of 7.547, the Perceived Usefulness (PU) variable has an effect on Behavioral Intention (BI) with a t value of 7,259, the Attitude Toward Using (ATU) variable has an effect on Behavioral Intention (BI) with a t count of 4,131, the Perceived Usefulness (PU) variable has an effect on Attitude Toward Using (ATU) with a value of The t count is 2.810, and the Perceived Ease of Use (PEU) variable has no effect on the Perceived Usefulness (PU) variable with a t value of 0.308.

Keyword: Perceived Usefulness (PU), Behavioral Intention (BI), ANBK, TAM.
