

INTISARI

Toko Pertanian Rangkul Tani merupakan toko yang berada di kabupaten banyumas. Bergerak dibidang penjualan disektor pertanian yang terus berkembang dan berusaha bersaing dengan toko sejenisnya. Jumlah konsumen meningkat, pengaruhnya pembukuan harus lebih teliti lagi. Kendalanya adalah Kontrol terhadap persediaan khususnya pembelian barang kepada supplier yang dibeli barangnya benar-benar cepat habis. Kemudian pemilik Toko Pertanian Rangkul Tani tidak setiap hari pergi ke toko karena kesibukan tetapi beliau menginginkan sebuah sistem yang dapat memantau dan mengontrol penerimaan hasil dan persediaan. Enterprise Resource Planning (ERP) adalah sistem informasi terintegrasi yang menjadikan sebuah bisnis proses menjadi satu kesatuan sistem. ERP diharapkan mampu menyelesaikan permasalahan di Toko Pertanian Rangkul Tani. Hasilnya adalah implementasi ERP pada Toko pertanian rangkul tani dapat diterapkan terutama pada persediaan.

ABSTRACT

Rangkul Tani Farm Shop is a shop located in Banyumas Regency. Engaged in sales in the agricultural sector which continues to grow and tries to compete with similar stores. The number of consumers increases, the effect of bookkeeping must be more thorough. The problem is the control of inventory, especially the purchase of goods to suppliers whose goods are purchased really quickly run out. Then the owner of the Rangkul Tani Farm Shop does not go to the shop every day because he is busy but he wants a system that can monitor and control the receipt of produce and supplies. Enterprise Resource Planning (ERP) is an integrated information system that makes a business process into a unified system. ERP is expected to be able to solve problems at the Rankul Tani Farm Shop. The result is that the ERP implementation at the Farmer's Farm Shop can be applied mainly to inventory.
